

• Galamsey has caused so much destruction to the environment.

Sustain 'galamsey' fight

DEAR Editor, The recent fight against 'galamsey' by the government needs commendation. This is because the illegal mining activities have cost us a lot.

In addition to degrading our environment, 'galamsey' has polluted our water bodies thereby increasing the cost of treatment to provide potable

water for citizens.

That is why we support this fight. Our forefathers have done so much for this country and we do not have to destroy it as many more generations will come after us.

Consequently, I urge the government not to relent in its fight against 'galamsey'. Let us sustain this fight and make sure

the environment is not destroyed.

We should all play our part and support the government so that we can save this country from destruction.
